

TECHNOLOGY PLAN UPDATE

Administrative hardware and software has been upgraded in all of Peace Wapiti schools and department offices. The intent is to maintain the status quo for the next few years or until such time as change is required.

Continued part-time support is provided to assist with ICT program implementation.

The Peace Academy of Virtual Education (PAVE) program was expanded to include grade eleven course offerings. This will be extended to include grade twelve in 2002/2003.

Student satisfaction with access to computers has not changed significantly over the past 3 years. This is a matter of some concern to Administration. Efforts will be made to implement strategies to address this.
